

Climate Governance Singapore Curriculum

As the knowledge partner, the Singapore Management University (SMU) curates a content library of useful research and pedagogic materials. It also curates and delivers a suite of training programmes to help stakeholders better address the challenges of climate change, and organises events and public programmes to raise awareness and understanding of the issues involved.

3 Tiers of Engagement

4 Domains of Knowledge and 12 Areas of Expertise

Understanding the Climate Challenge

Law, Policy and Regulations

Implications for the Business

Implications for the Board
